May 25, 2022

1 Getting Started

At first, the user need to be registered. If a user has not registered yet, he or she can register by clicking the register button and fill the username, password and email areas. Then the user can log in by clicking the log in button and filling the username and password areas. If the password is not correct application will show an error.

2 Game Playing for Single Player

After logging in, the user can see the leaderboard button on the main menu and by clicking it he can see the monthly and weekly leaderboards with corresponding buttons on the screen, and can go back to main menu from the back button. The user can start a game with Play Game button on the main menu. The user starts the game by rolling dice and making the move. After that, if there is a property that can be bought, user can buy it if he has enough money. Moreover, the game ends where there is a bankruptcy which is a player has no money.
